The EPD 2016 Project in Shan State

PREFACE

In Southern Shan State, the EPD 2016 Project commenced with the survey of 20 candidate schools in 10 Townships between January and February 2016. The construction commenced in May 2016 at 10 schools and those were scheduled to be completed by handing over of the new school buildings to the Department of Education from October 2016 to December 2016.

In Northern Shan State, the EPD 2016 Project commenced with the survey of 17 candidate schools in 9 Townships between 13th January and 4th February 2016. The construction commenced in April 2016 at 10 schools and those were scheduled to be completed by handing over of the new school buildings to the Department of Education from September 2016 to December 2016.

OBJECTIVES

The objectives of the Education for Peace and Development Project (EPD) in the Republic of the Union of Myanmar (Phase III project) are as follows;

1. To provide children in Shan State an opportunity for better basic education
2. To improve livelihood in communities by means of community development activities
3. To promote sustainable and effective school operations with the fund generated by community development activities
4. To develop community's faculties to invigorate local society
5. To contribute to national consolidation and reintegration through providing progress of education in border areas in Myanmar

AREA

The project covers only some areas of Southern Shan and Northern Shan States based on Taunggyi Office and Lashio Office respectively.

ACTIVITIES

The project is conducted with the following five components;

- 1) Field survey
- 2) School Building Construction
- 3) Community Development Activities (Soft-Project)
- 4) Agricultural Development and Extension
- 5) Mini Project
- 6) Other Activities
- 7) Follow-up Activities

The detail of activities and achievements of the EPD 2016 Project in Southern/Northern Shan States are summarised below.

APPROACHES

In order to build school buildings which will be well managed in the long run, the EPD project adopts community participatory approaches are described below:

Planning stage Local community firstly presents their original plan for community development including school building construction. They are well informed and consulted about the project before starting to draw a concrete plan together with Saetanar for implementation of the project.

Implementation stage In order to promote self-help and self-support, local community makes a contribution in kind and/or in labour as much as possible to school building construction according to their own original plan. The EPD project makes up for a shortage of their budget afterwards. Local community is also involved in supervising construction according to the specifications provided by Saetanar.

Meanwhile, local community operates concrete plans of community development activities into effect. The fund for the operation, which is calculated in accordance with their contribution to the school building construction, shall be provided by Saetanar.

Follow-up Stage The Myanmar Government may grant formal status to the school built by this project and send teachers. Local community is responsible to maintain and operate the school in sustainable way using the income generated by the above community development activities and the self-awareness of the community people is raised through the project. Saetanar visit the school/community from time to time and give some advices if it is necessary.

Furthermore, the EPD project attempts to improve the overall living conditions of target areas by facilitating local communities to discover their own potentials and strength.

I. FIELD SURVEYS

To conduct ground checks and surveys on initial data provided by Na Ta La
To identify target area and population
To formulate ways of working together with target communities
To make detailed plans for school constructions
To discuss about village development activities

I. FIELD SURVEYS

- (1) Introduction
- (2) Principles of selecting the target schools of EPD Project
- (3) Surveyed school list (Table 1)

FIELD SURVEYS

(1) Introduction

Southern Shan State

Saetanar staff surveyed 16 schools in (8) Townships of Taunggyi District and 4 schools in (2) Townships of Loi Lem District – (Total- 20 schools) respectively from 12th January 2016 to 18th February 2016 accompanied by the officials concerned from NATALA. 10 schools were selected as target schools for EPD 2016 Project.

Northern Shan State

A list of 17 candidate schools from 9 townships was provided by the Deputy Director of NaTaLa, Lashio. Survey was conducted from 13rd January 2016 to 4th February 2016. 10 schools were selected as target schools for EPD 2016 Project.

(2) Principles of selecting the target schools of EPD Project

- (1) Having a large number of students, a new school building is really needed to be constructed.
- (2) The community having enthusiasm in their children's education.
- (3) Good participation and preparation by the community in school building construction.
- (4) Probability to become a model village / region to neighboring communities by implementing EPD Project.

The objectives of EPD Project are not only to construct new school building but also to get the cooperation and participation of the community for sustainable development of the region.

Therefore, the selection of the school to be supported by EPD Project is done based on comprehensive aspects which are included in the principles of EPD Project as well as the answers of survey questionnaires from each school, meeting with teachers, Board of trustee and parents and teachers association members and the local people.

B) Hopone Township Sustainable High School Level Stipend Awarding Programme

Saetanar has implemented **Hopone Township Sustainable High School Level Stipend Awarding Programme** starting from the academic year(2016-2017) with the cooperation of **Hopone Township Education family** and **Hopone Township Pyin Nyar Dana Association**.

• List of schools included in the High School Level Stipend Awarding Programme

Stipend will be given to High School Level students (Grade 9 and Grade 10) selected from the following 5 High Schools and 4 (branch) High Schools – altogether 9 schools in Hopone Township.

1. 1.No.1 Hopone Basic Education High School
2. 2.No.2 Hopone Basic Education High School
3. 3.KyaukKa Char Basic Education High School
4. 4.Nam Koke Basic Education High School
5. 5.KyaukTannBasic Education High School
6. 6.Sa Ngaw Basic Education High School (branch)
7. 7.Sam Sout Basic Education High School (branch)
8. 8.MongPyinPha Lain Basic Education High School (branch)
9. 9.Paung Lin Basic Education High School (branch)

• Stipend awarded during (2016 – 2017) academic year

High school level stipend was awarded to 12 Grade 9 and 10 Grade 10 students. Number of students to be awarded with stipend is decided based on the number of students attending Grade 9 and 10 classes in the respective schools. If the number of students is over 120 in either Grade 9 or 10 , 2 students from each grade is selected as stipend awardees. The number of awardees changes every year depending on the number students studying in Grade 9 and 10. But the total amount of stipend for each year is fixed as 4, 4000,000 MMK, i.e. for 2016- 2017 and 2017-2018 academic year.

Starting from the academic year (2018-19), Hopone Township Educational Family will take responsibility for stipend fund with the joint cooperation of Pyin Nyar Dana Association.

No.	School	Grade 9	Grade 10	Total
1.	No. 1 Hopone BEHS	2	2	4
2.	No.2 Hopone BEHS	2	2	4
3.	KyaukKa Char BEHS	1	1	2
4.	Nam Koke BEHS	1	1	2
5.	KyaukTann BEHS	1	1	2
6.	Sa Ngaw BEHS (branch)	1	1	2
7.	Sam Sout BEHS (branch)	2	1	3
8.	MongPyinPha Lain BEHS (branch)	1	1	2
9.	Paung Lin BEHS (branch)	1	-	1
		12	10	22

Remark: Paung Lin Basic Education Middle School has been upgraded to Basic Education High School (branch) level in the academic year (2016-17). So being the first year, there are only Grade 9 students.

Stipend amounting to 20,000 MMK will be given to each student per month for 10 months every academic year. Each student will get 200,000MMK for 10 months as stipend award.

- **Providing Stipend fund to the management committee of Hopone Township sustainable High School Stipend Awarding Programme.**

On 14.12.2016, Saetanar provided 4,400,000MMK to the management committee as fund for providing stipend to 22 students from 5 High Schools and 4 branch High Schools at Hopone Township Education Office.

- **Follow up**

(1) In the academic year (2014-15), 9 students who got stipend appeared for the matriculation examination and 8 students graduated .Out of these 8 students, One got 3 distinctions and 2 got 1 distinction each.

VI. AGRICULTURE DEVELOPMENT AND EXTENSION

**To improve the community's livelihood,
To develop a sustainable agriculture**

Agricultural Development and Extension Activity in Southern Shan State

Saetanar has been conducting Agriculture Development and Extension Activity by demonstrating and giving educational talks on the techniques of organic farming to the native farmers of the EPD Project (or) Mini Project areas in order to reduce the use of chemical fertilizers and insecticides in their agriculture.

In the year 2016, Saetanar has selected the following 7 villages as model villages to conduct Agriculture and extension activity and total 111 farmers participated in the activities (SRI activity: 31farmers, Dochakukin activity: 36 farmers, bamboo vinegar activity 30 farmers, Study trip 14 farmers)

No.	Township	Village Tract	Name of village
1.	Taunggyi	Ban Kway	Kone Nyunt
2.	Taunggyi	Ban Kway	Kone Mo
3.	Taunggyi	Ban Kway	Oak Pho
4.	Nyaung Shwe	Min Chaung	Nway Dama (South)
5.	Nyaung Shwe	Min Chaung	Nwar Dama (North)
6.	Hsi Hseng	Naung Mon	Kone Kyaung
7.	Pindaya	Pin Pyaw	Shouk Cho

Remark : U Khuah Hrang, agriculturist, visits the villages, where community farms are being conducted, from time to time to inspect the condition of community farms, gives necessary advice regarding the community farms and their agricultural problems, and also gives educational talks on organic farming.

Activities conducted at the above-mentioned 7 villages

1. Growing paddy by System of Rice Intensification (SRI)
2. Demonstration on producing micro-organism and preparing Dochakukin Natural Fertilizer
3. Demonstration on producing bamboo vinegar
4. Demonstration on how to prepare fermented fruit juice and fish amino acid
5. Educational talks on agriculture such as good agriculture practices, effectiveness of green manure, Natural insecticides, methods of controlling pests affecting paddy plants, life cycle of insects, and prevention of soil erosion and contour method.

1) Growing paddy by System of Rice Intensification (SRI), 2016

The following farmers from the respective villages grew paddy by SRI at 0.5 acre plot each.

Remark : A) Saetanar provided each of them with

- 1) fund amounting to 47,000 MMK for preparing Dochakukin Natural Fertilizer,
- 2) one inter cultivator worth 27,000 MMK,

B) In 2016 the traditional technique produced on average 55 baskets/acre while SRI produced 134 basket/acre.

C) One basket of paddy equivalent to 20.884 kilogram.

Remark :Although they grew paddy seeds by SRI to get seedlings, they used the traditional method to transplant these seedlings which are at the age between 15 and 20 days.

Effectiveness of growing Paddy by System of Rice Intensification (SRI)

1. Amount of paddy seeds needed to be grown per acre by traditional method is 41.76 kg while SRI needs only 4 kg.
2. No expenditure on taking out paddy seedlings.
3. Paddy seedlings are strong and healthy.
4. More new plants come out from the mother plants than those by traditional method.
5. Almost all the paddy seeds are matured.
6. Yield per acre is more than that of the traditional method.
7. One seedling is grown within an area of (10"x9") ft. So it gets sufficient nutrients and thrives well and the ears are longer with more seeds than those grown by the traditional method.

Preparation of Dochakukin Nautral Fertilizer

Demonstration on preparation of Dochakukin Nautral Fertilizer was carried out at Kone Nyunt, Kone Moh, Oak Pho, Shouk Cho, Kone Kyaung and Nwa Dama villages respectively.

Constructing a Kiln for producing bamboo vinegar

On 24.11.2016, a kiln for producing bamboo vinegar was constructed at Nwar Dama BEMS(b) with the aim of getting fund to provide the needs of the school by producing and selling it. 30 villagers participated in the construction. U Ngwe Tun and U Myint Lwin have taken the responsibility for producing bamboo vinegar at their own expense. 25% of the amount obtained by selling bamboo vinegar will be provided as fund for supporting the needs of the school. 1100 litres of bamboo vinegar was produced up till 31.12.2016 and 330 litres were sold at 750 MMK per litre.

Study trip to Tar Yaw Agriculture Research Farm, Taunggyi Township

Aim of study-trip

1. To familiarize them with modern techniques of growing paddy.
2. To let them know how paddy seeds for seedlings are grown and how they are stored.
3. To let them know that one kind of paddy seeds can be grown continuously for only 3 years. After that a different kind of paddy seeds should be grown.
4. To develop and extend the techniques of agriculture.
5. To decrease the cost of growing paddy per acre so that farmers get more profit.

Participants – 14 farmers who had grown paddy by SRI

Date observed – 20.10.2016

4) Achievement of Agriculture Development and Extension Activity being carried out at Nwar Dama village, Min Chaung village tract, NyaungShwe Township.

Saetanar constructed a school building measuring (120x30)ft at Nwar Dama BEPPS as 2010 Mini Project with the collaboration of the community in the academic year 2010-11.

After that, U Aye Thwe, the agriculturist of Saetanar, introduced organic farming to the villagers of Nwar Dama. The techniques of preparing Dochakukin Natural Fertilizer, bamboo vinegar, preparing fish amino acid and fermented fruit juice were also demonstrated there. Since then, the villagers have prepared the above- mentioned natural inputs to use at their farms. Now, there are 16 kilns at Nwar Dama (South) and Nwar Dama (North) for producing bamboo vinegar to sell. Moreover, some villagers have prepared Dochakukin Natural Fertilizer and fish amino acid for sale. The organic vegetables of Nwar Dama village such as tomatoes, egg plants, lettuce, string beans French beans, carrot, radishes, pumpkins, papaya and ground nuts have been sent to Mar Lar Mying Company, Yangon since 28.1.2014.

U Khauh Hrang, the agriculturist, visits Nwar Dama village from time to time to inspect the condition of their organic farms, discuss with them regarding their agricultural problems and give advice on their agriculture. In the year 2016, Saetanar introduced the System of Rice Intensification (SRI) at Nwar Dama village and 2 villagers grew paddy by SRI at 0.5 acre plot each without using any chemical inputs. In the year 2017, 10 farmers each from Nwar Dama (North) and South will grow paddy by SRI.
